### Product Knowledge Manager (m/f/x)

You are at home in the world of application development and control systems engineering, you are enthusiastic about the exciting application possibilities of our complex systems and are able to convey this enthusiasm to others. You bring a passion for imparting knowledge to others to make their tasks easier and more efficient and you enjoy documenting our diverse tools.

#### Tasks

- | Provide trainings of our DCS system PMSXpro to both end-users and System Integrators
- | Deliver DCS Sales Support presentations
- | Assist with pre-release quality verification and manage the product's documentation
- | Provide ad-hoc application support to internal project execution teams
- | Ad-hoc internal sales consultancy and act as external customer advisor

#### Profile

- | University Degree and relevant work experience in the appropriate field, e.g. Computer Science, Control and Automation Engineering, Mechanical Engineering / Automation, etc.
- | Software development experience (preferable but not mandatory)
- | DCS / SCADA market knowledge (ideally)
- | Good people and customer interaction skills
- | Preferably, with project delivery experience (incl. commissioning on site)

- | Control network protocols (working knowledge - Profibus/-net, IEC 61850, IEC 60870, Modbus, CC-Link IE)
- | Fluent in English and German – additional languages highly desirable
- | Solution-oriented approach and mind-set
- | Sure-footed and confident demeanour
- | Ability to assist existing and to excite new customers with our products
- | Willingness and desire to travel

### **Benefits**

- | Working in an internationally operating company
- | Working independently, flexible working hours
- | Good development prospects
- | Attractive remuneration
- | Social benefits, company pension scheme, bike leasing
- | Employee events
- | Onboarding
